Subject	ELECTRICAL INFORMATION

GENERAL ELECTRICAL INFORMATION (ME-ML-100)

The electrical system on ME-ML-100's is a full wave, D.C. system. All of the lights run directly off the battery. Refer to illustration #6 for standard wiring diagram.

There are two ignition switches for this wiring system. Both switches function the same and plug in the wire harness the same, but are different inside. Refer to illustration #1 for type 1 switch. Refer to illustration #2 for type 2 switch. Refer to illustration #6 for the switch code. This code is the same for both switches. Both ignition switches have the same part number (11105017) because they are totally interchangeable. (This electrical system uses wire harness #11105014)
