Number SVB-186

Model MT-MI-MS-175

Subject Transmission  
Adjustment

## INDIAN 175 c.c. Engine Transmission Adjustment Procedure

1. Drain the engine oil.
2. Remove the kick start lever.
3. Remove the clutch cover.
4. Remove the clutch assembly.

The adjustment is done by moving the eccentric bolt so that the shift fork has equal distance between the pins in the shift drum. The motorcycle must be in gear prior to adjusting. The equal distance from the fork and pins should be the same in 1st, 2nd, 3rd 4th and 5th gear.
